

# ECHO Extension

The Inductosense ECHO is an extension coil designed to work with WAND TM sensors.

The Inductosense ECHO is an extension cable designed to work with WAND sensors.

One end of the ECHO is applied over a pre-installed sensor (over the sensor coating), and the other end becomes the new data collection location. The ECHO is ideal for difficult-access locations such as underneath insulation, confined access, or at height.

The ECHO comes in a variety of set lengths, including 45cm, 100cm, 200cm and 400cm.

Up to  
400cm

Improved  
Accessibility

Easy to  
use

## Technical Specifications

Product Code	ECHO45	ECHO100	ECHO200	ECHO400
Length	45cm	100cm	200cm	400cm
Thickness	1mm	1mm	1mm	1mm
Weight	10g	20g	50g	90g
Maximum Operating Temperature	180°C	180°C	180°C	180°C
