

ECHO Extension Data Sheet

WAND TM Sensor Accessory

The Inductosense ECHO is an extension coil designed to work with WAND TM Sensors. One end of the coil is applied over a pre-installed sensor (over the sensor coating), and the other end becomes the new data collection location. The ECHO is ideal for difficult-access locations such as underneath insulation, confined access, or at height.

The ECHO comes in a variety of set lengths, including 45cm, 100cm, 200cm and 400cm.

Technical Specifications

Product Code	ECHO45	ECHO100	ECHO200	ECHO400
Length	45cm	100cm	200cm	400cm
	17.7 inches	39.4 inches	78.7 inches	157.5 inches
Thickness	<2mm	<2mm	<5mm	<5mm
	<0.07 inches	<0.07 inches	<0.20 inches	<0.20 inches
Maximum Operating Temperature	180°C	180°C	180°C	180°C
	356°F	356°F	356°F	356°F
